DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 24, 2006 has been entered.

However, Examiner notes that the amendment filed on July 24, 2006 does not show all the changes made to the claims. As understood, the after-final amendment filed May 22, 2006 was not entered. Thus, the amendment filed on July 24, 2006 should have shown changes made to the claims that were finally rejected (claims dated March 9, 2006).

Claims 1, 3, 4-7 and 10-16 are currently pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4, 6, and 12-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 4 and 6, "the maximum search window variable circuit" lacks proper antecedent basis.

Regarding claims 12-15, it is unclear in its given context what "the changed maximum search window" is referring to.

Regarding claim 16, it is unclear in its given context what it means to detect "a quantity of light for *inputting* the image signal *inputted* from an image to detect the quantity of light" and to detect "a movement speed for inputting a movement value to detect a movement speed," and "generating a sampling rate control signal for generating the sampling rate control signal." Furthermore, "the changed maximum search window" lacks proper antecedent basis. In addition, it is confusing to use the language "*calculating* the maximum search window *for calculating*" and "*calculating* a mask window *for calculating*."

Since the scope of the invention cannot be ascertained, claims 12-16 have not been examined on their merits.

Allowable Subject Matter

4. Claims 1, 3, 4-7, 10 and 11 are allowed over the prior art of record.
5. The following is an examiner's statement of reasons for allowance: an optical pointing system, as claimed more specifically in combination with: adjusting a size of the maximum search window and a size of a mask window according to the quantity of light and the movement speed; and changing a sampling rate based on the image signal or the movement value, is not disclosed or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."
